

# **Business Plan** 2019-20

Knowes Housing Association 10 Field Road Faifley Clydebank G81 5BX Tel: 01389 877752 Fax: 01389 879858

Email: info@knowes.org Website: www.knowes.org

Knowes Housing Association Limited is a registered non making organization under the Community Benefit Act 2014 No 2518R(S) and a registered social landlord (HEP300), Scottish Charity No: SC027466 and a registered property factor (PF000201)

## **CORE VALUES**

#### RESPECT AND EQUALITY OF OPPORTUNITY

We treat everyone with respect and recognise and respond to their individual needs

CUSTOMER FOCUSSED

We ensure that our customers are at the core of everything we do

#### COMMUNICATION

We communicate effectively with our customers and colleagues

#### **CONTINUOUS IMPROVEMENT**

We are committed to review, develop and improve all of our services and processes

#### HONESTY AND PROFESSIONALISM

We behave in a professional manner displaying honesty and integrity at all times

#### Background to Knowes Housing Association

Knowes was formed on 1<sup>st</sup> March 1998 following a large scale voluntary transfer of 1,115 properties in Faifley area from the former Scottish Homes. Knowes is a charitable registered social landlord managed by a committee of local tenants and owner occupiers.

Since 1998 Knowes had demolished 148 unpopular tenement flats and replaced them with 119 modern cottage type properties.

We were audited by Scottish Homes in 2000 and received an overall "C" which was deemed to be good for the new Association. Knowes was re-inspected in January 2008 and achieved an overall "B" grade which demonstrates an improvement since the first inspection. Knowes currently features in top quartile in the Scottish Housing Regulator's Annual Statistical Performance in all areas of performance.

We have 22 people employed in the office.

#### <u>MISSION</u>

"Provide good quality affordable housing and services which meets the needs and aspirations of the community we serve, ensure resident control of current and future housing and contribute to the continued improvement of the local community and environment".

## <u>VISION</u>

"Shaping the Future of Housing and Improving the Quality of Life in our

Community".

#### **STRATEGY**

### Our Strategy is to:

#### • STRENGTHEN

our current position within the marketplace and continue to build upon our performance

#### • DIVERSIFY

through getting involved in wider action projects and involvement with new client groups

#### • GROW

by increasing the quality, choice and number of houses available

This will be achieved by meeting our objectives.

## **STRATEGIC PERFORMANCE MANAGEMENT PLAN 2019-20**

#### **INTRODUCTION**

The purpose of this plan is to provide a framework which will ensure that Knowes achieves the levels of performance required by the Committee, the Scottish Housing Regulator and the customers that the Association serves.

This plan must be read in conjunction with the policies and procedures that govern the functional areas of operation.

Performance management underpins all that the Association does and ultimately impacts on the service provided to our customers. This plan will highlight the measures used to manage Knowes' performance at a managerial level.

#### FRAMEWORK

The performance management framework can be considered at an organisational level, a departmental level and an individual level.

#### 1. ORGANISATIONAL LEVEL

At an organisational level the following tools will be the basis of the performance management framework:

#### • **BENCHMARKING**

The Association benchmarks with peer organisations using ARC data published by the Scottish Housing Regulator.

The Association also participates in the QEF benchmarking group, and uses this to benchmark the Association's main functions with the other members of the group.

Committee reports on an ongoing basis will compare the Association's actual performance with benchmarking information where appropriate. The peer groups we will benchmark with are all of Scotland and WDC based Housing Associations. The benchmark data will provide an indication on an ongoing basis as to where Knowes performance compares with others.

We will also use SFHA forums and the WDC Housing Manager forum to benchmark performance.

## • INVESTORS IN PEOPLE(IiP)

The Association obtained the Gold Level IiP award in 2014 and has now opted to be assessed using the new IiP standard introduced in 2015. The sixth generation of the standard contains nine indicators that put management excellence at the heart of the organisation, this reflects the Association's move to a culture of coaching and mentoring.

## <u>CUSTOMER SERVICE EXCELLENCE (CSE)</u>

Knowes was awarded the Government Customer Service Excellence Award in 2010; an annual assessment is carried out by the CSE assessor to ensure that all criteria continue to be met. The Association currently holds the Compliance Plus award.

#### INTERNAL AUDIT

The Association has appointed internal auditors to carry out a performance audit of specified functions on an annual basis. The functions audited rotate from year to year. The Association's audit subcommittee and management team agree which areas are to be audited each year. On completion of the audit an action plan will be produced to tackle any areas requiring improvement and noting areas of best practice. 2018 – 19 audit plan is still to be approved.

<u>SATISFACTION MONITORING</u>

Our commitment to our tenants is that we will conduct a survey every 3 years to track our performance. The last full tenant satisfaction survey was carried out in 2016 / 17 and will be carried out again around September 2019.

Satisfaction surveys will also be carried out on the following service areas:

- All maintenance contracts
- Day to day repairs (reported quarterly)
- Allocations
- Medical adaptations
- Services to owner occupiers (every three years)
- Close cleaning annually

Once collated, the results of the surveys are analysed and an action plan prepared outlining areas where improvement can be made to improve the service we provide. These results and action plans are reported to the appropriate committee and a copy is given to the relevant department.

#### <u>CUSTOMER FEEDBACK</u>

We have implemented the Scottish Public Service Ombudsman (SPSO) Complaints Handling Procedure. All complaints are regularly monitored at frontline and investigation stage and a report is presented to the Senior Management Team and the Management Committee on a quarterly basis.

Comments received from customers are analysed to assess the potential for implementing changes to improve the service. A suggestion box is located in reception and customers are also encouraged, through satisfaction surveys, to make suggestions.

Staff suggestions are reviewed with a view to improving any area of the Association's service delivery and working practices. Staff are encouraged to

make suggestions, and those which result in improvements being implemented are rewarded.

#### POLICY AND SERVICE REVIEWS

All policies and procedures are reviewed on a maximum of three-year intervals to ensure compliance with current guidance and legislation. Where appropriate the service which the policy refers to will be reviewed at the same time as the policy. Reviews will involve an in-depth evaluation of how we deliver and monitor each service.

## <u>REPORTING</u>

The Director will report to the Committee as at the end of September and financial year end on KPIs as detailed in Appendix 1. The sub committees will also receive quarterly reports on the performance relevant to each sub committee.

## 2. DEPARTMENTAL LEVEL

#### <u>REGULAR REPORTING</u>

Each departmental manager shall prepare reports comparing performance with key performance indicators. These reports will be discussed at Committee and Senior Management Team meetings.

The KPIs that will be monitored are:

#### **Housing Services**

Non Tech Arrears v target - monthly

Technical arrears v target - monthly

Total current arrears v target - monthly

Former tenant arrears v target – 6 monthly

Garage site / lock up arrears v target - monthly

Rent void loss v target - monthly

Average days taken to let – calendar v target - quarterly

Average days taken to let – working v target - quarterly

Number applications processed within target – quarterly

% tenants satisfied with condition of allocated property v target - 6 monthly

% tenants satisfied with allocation service provided by Knowes v target – 6 monthly

## **Property Services**

Contract progress v programme - monthly

Contract spend v budget - monthly Tenant satisfaction v target - quarterly Works completions by category v targets - quarterly Pre and Post inspection performance v target - quarterly Expenditure v budget at budget heading level - monthly Gas servicing performance v target - quarterly Average time to complete emergency and non-emergency repairs - quarterly Repairs appointments – quarterly Right first time fix - quarterly

#### Development

Contract progress v programme - Monthly Spend v Budget - Monthly

#### Finance

Budgets v Spend in all areas of operation – quarterly Financial Ratios as follows: Interest cover - quarterly Debt per house - quarterly Voids % - quarterly Arrears % - quarterly Bad Debts – 6 monthly Staff costs / Turnover - quarterly Liquidity ratios - quarterly Profitability ratio - quarterly Tenant recharge recovery – 6 monthly

#### Governance

Committee member attendance - monthly Complaints dealt with v target – 6 monthly Management Committee reports issued on time v target – 6 monthly Completion of Management Committee and AGM minutes v target – 6 monthly Average time lost through sickness v target – 6 monthly Time taken to respond to letters, email and fax – 6 monthly Time taken to answer phones (random sampling) – 6 monthly

#### DEPARTMENTAL OBJECTIVES

Objectives are set for each department; these are linked to the strategic objectives and agreed on an annual basis. These will be assessed on an ongoing basis throughout the year at team meetings.

## 3. PERSONAL LEVEL

#### STAFF PERFORMANCE IMPROVEMENT AND TRAINING REVIEW

The performance of staff is maximised through a system of mentoring/coaching, and performance review on an ongoing basis. The process recognises shortcomings of rigid annual/bi-annual performance appraisal systems. Training and development is discussed at team meetings and an annual training plan is put in place. The Director and Committee undergo a different arrangement from the rest of the staff in order to meet regulatory requirements. A competency based framework was developed in 2014; this will be used alongside a coaching style of management in order to ensure that all staff members demonstrate the behaviours that are expected of them. Ongoing coaching will ensure that there is support in place to help staff members develop.

The actual performance management framework will be reviewed annually by the Senior Management Team and the processes and outcomes will be a standing item for the monthly Senior Management Team Meetings.

# Appendix 1

## MARKETING PLAN 2019-20

## EXECUTIVE SUMMARY

The 2019 -2020 Marketing Plan for Knowes Housing Association outlines the activities that we will become involved in, to ensure a high demand for the products and services that we offer to tenants and owner-occupiers. We will build upon our strengths and continue to provide the delivery of high quality products and services that meet the needs of existing customers, and generate interest from new customers. This marketing plan is based on an analysis of the current market situation and enhanced with the information gathered at the Management and Strategy Away Days.

## **CURRENT MARKETING SITUATION**

Knowes has three markets of interest:

- 1. Letting
- 2. Development
- 3. Factoring

The Marketing Plan will discuss each of these markets further to devise strategies we will use to effectively service these markets.

## THE LETTING MARKET

This market consists of the following segments:

- Singles
- Couples
- Young families
- Established families
- Mature adults
- Applicants from other countries

## THE DEVELOPMENT MARKET

Again here we have three or potentially four markets of interest:

- The Scottish Government
- West Dunbartonshire Council
- Private Landowners
- Mid market rent

## THE FACTORING MARKET

We plan to consolidate the existing factoring services we offer to customers who live within Faifley and Duntocher. We also require to implement the requirements of the Property Factors (Scotland) Act 2011 and the accompanying code of practice. This Act places additional responsibilities on Knowes as a Property Factor.

We have been informed that Ross and Liddell who factor 56 properties in Craigton and Burnbrae Streets have withdrawn their services from June 2014. Some of the properties are factored by Apex, however some remain not factored. It was not considered financially viable for Knowes to take over the factoring of these properties, nor was there consensus of the owners.

## **OBJECTIVES & ISSUES**

- To attract tenants to the area by promoting Knowes and raising our brand awareness as an attractive housing provider in the Faifley and surrounding areas. We will monitor this objective by establishing the growth of our waiting list.
- To continue to provide a high quality service to the existing users of our factoring service.

## MARKETING STRATEGY

We plan to adopt a strategy of 'informing' the target market to:

- raise awareness of Knowes
- educate the general public about what we are about –our products and services and create a brand image, which portrays us as 'providing good quality affordable housing which meets the needs of the communities we serve'.
- Target people directly in order to increase demand for properties not in high demand

For the **Letting market** we aim to target singles, couples, young families, established families and mature adults from all ethnic backgrounds from the local area and from further afield. By reaching all of these segments we hope to achieve a balanced and sustainable community. For Knowes to attract these segments we will maintain and increase our involvement in the regeneration of Faifley and surrounding areas, and will partake of wider action within the area to promote social inclusion. We will ensure that we highlight these activities so it is clear that Knowes cares about the community. The necessity for advertising activity will be determined through monitoring of waiting lists and where possible targeting advertising at groups that are underrepresented in the community.

We have currently identified a lack of demand for 4 apartment flats, and as a result we need to target this type of property specifically. The marketing activity relating to the letting market will therefore require to focus on media that is likely to reach families in particular.

#### Newsletters

We will continue to produce a quarterly newsletter for our tenants and owner occupiers to keep them up to date with what is happening in the community and help create a sense of community spirit.

#### Website

We will continue to update our website to ensure prospective tenants and customers have access to all the information they need in relation to our properties and services. We will use the website to advertise specific property types. We will use keywords to ensure that the website is found by search engines (this helps to ensure that individuals looking for properties in Clydebank will be directed to our website).

#### **Onelan Screen**

The Onelan screen in the Association's reception area will be used to provide up to date information for visitors to the office such as forthcoming events and performance figures.

#### Within other Organisation's Offices

We will ensure our literature is displayed within West Dunbartonshire Council offices and also within other RSL's offices throughout the authority area.

#### Schools

We will work with the two local schools on joint projects and ensure that Knowes is well publicised within both schools.

For the **Development market** there is currently little opportunity within West Dunbartonshire given that WDC has agreed to use the Wheatley Group as their preferred developer for the foreseeable future.

For the **Factoring market** we aim to ensure our customers receive a high quality factoring service and this is publicised so that we can attract our target market. Knowes wants to be known for its provision of a cost effective and high quality factoring service where we are meeting the needs of the community we serve.

#### ACTION PLAN

#### To ensure that the sources that direct tenants to ourselves (e.g. West Dunbartonshire Council) have the appropriate information about us and have a favourable attitude towards us :

- We have produced a leaflet that details the services we offer. We will keep the information up to date and ensure they are distributed to the desired sources. To monitor their use we will carry out checks to ensure that the leaflets are being displayed in an appropriate place for prospective applicants to view.
- As our current waiting lists mainly consist of prospective tenants who are from the local area or have connections within the area this suggests that our current tenants are providing us with free publicity. Therefore Knowes must maximise upon these positive word of mouth recommendations.
- Having an internet presence should greatly increase our potential for customer reach. We will endeavour to provide information to current and prospective tenants, which is up to date. We aim to continually improve upon our current website offering. We will ensure that our website uses keywords to bring our website into search criteria.
- We will investigate online advertising opportunities. This will include Right Move, Gumtree and other similar sites to advertise the regular availability of 4 apt flats in particular.
- We will investigate the benefits of advertising in the press, although we recognise that this is an expensive option and generally only covers a short period of activity.

#### To raise the awareness of Knowes locally and into the city.

Listed below are a number of advertising methods, which could be used to raise Knowes' awareness.

#### PR Events

By getting involved in community projects we can utilise a cost-effective method of publicising the work we do. As well as portraying Knowes as a community based business we will also raise awareness of the Association.

#### Support Local Groups

We will continue our involvement and support with local youth football teams, local youth groups, and school activities, to name but a few. We will review the groups which we support on an ongoing basis.

#### Advertising

We will advertise in a variety of media such as the Clydebank Maps in libraries in West Dunbartonshire, the bags for books in libraries, Key Rings

and Fridge Magnets, PAIH directory, Clydebank Post and other media directed at people likely to be in need of social rented accommodation.

#### Internet

We will use our website and search engine tags to ensure people looking for rented property online are directed to our website or specific adverts for particular properties.

By partaking of the above activities we will raise Knowes' profile within the area and increase brand awareness within the wider business community, in particular housing related organisations.

By highlighting and publicising our successes we can be shown in a positive light to these organisations.

#### **BUDGET**

For some of the marketing tools that we use there will be little or no additional cost. For the other marketing activities there will be a cost to bear.

The budget for 2018-19 is £1500

#### **MONITORING OF PLAN**

It is important that we evaluate the impact of using the selected advertising tools. The effectiveness of these activities will be assessed over the time period and this will inform future year's plans.

# HUMAN RESOURCE PLAN 2019-20 (Incorporating Learning and Development Strategy)

## INTRODUCTION

The purpose of this plan is to ensure that the Association recruits the right people, provides training and opportunity for staff development and allows staff to maximise their potential with a view to succession planning.

This plan must be read in conjunction with the policies and procedures that govern the functional areas of operation.

## **BACKGROUND TO ORGANISATIONAL STRUCTURE**

Knowes Housing Association has undergone significant structural change since its inception in 1998, and particularly since 2007. The Association has varied its approach to filling vacancies during this time depending on the nature of the post and the skills/experience available within the organisation.

## RECRUITMENT

The Association as an employer aims to identify and employ the most suitable candidate for any vacant post and recognises that in order to operate effectively there has to be the right people in the right place at the right time. The Association will endeavour to attract and retain the most suitably skilled and versatile people.

Staff will be encouraged to undertake vocational training and/or qualifications.

Recruitment, staff development and staff training will be offered to all staff with a view to maximising the potential of all staff and having trained staff who have the capability and drive to further their career. A staff induction procedure is in place to ensure that new staff members feel more included within the overall team; it also helps to ensure that they fully understand our core values and processes.

## SUCCESSION PLANNING

All members of staff will be given the opportunity to gain qualifications or training to give them the skills, confidence and qualifications to apply for any vacancies that may arise in the future within the organisation.

## STAFF PERFORMANCE IMPROVEMENT AND TRAINING REVIEW

The Association will maximise the performance of staff members through a system of mentoring/coaching, self-directed teams and performance review on an ongoing basis.

The system has the following aims:

- To set realistic and achievable goals for each team, each member of staff and the Association
- To identify current achievements and establish ways to improve performance
- To promote good relationships between line managers and staff
- To promote the development of the individual and the Association
- To ensure the Association's core values are being adhered to in all areas of our work

The process will be driven by senior staff and relies on them driving a culture of change. Senior staff will undergo training to ensure they are competent coaches. The transition from the formal PDR process to self-directed teams will be assessed through staff surveys, liP interventions and a review of staff behaviours and attitudes. The process will also be regularly discussed at management and staff meetings.

## STAFF SURVEY

A staff survey will be carried out every 2 years or sooner if deemed necessary. This year we will carry out another survey to follow on from the comments made in the 2017 survey. A group will be selected consisting of representation from each department who will design the survey questions and analyse the results. It is important to keep a level of consistency from one survey to the next in order to compare the results.

A survey was carried out in December 2017 through to January 18 and the results were analysed and discussed with staff March 2018 with an action plan discussed with staff with a view to improve on some of the results where it can be seen that levels of satisfaction, morale and happiness had dropped. An IiP survey and a Knowes staff survey will be carried out in April 2019.

## LEARNING & DEVELOPMENT STRATEGY

The Association will ensure that staff and committee have the necessary skills to carry out their jobs and contribute towards the overall achievement of the organisation's objectives.

## **Underlying Principles**

This Strategy is based on the following key principles:

- L&D will be based on identified needs following a skills mapping exercise.
- L&D will take account of the Association's short & long-term objectives.
- L&D will take account of each department's business objectives.
- L&D effectiveness will be evaluated through informal mechanisms including coaching and self-managed learning and formal mechanisms such as an analysis of Return On Investment (ROI).

- Learning will be focused on the development of the necessary competencies in order to enable individuals to perform to the best of their ability.
- L&D will be considered at 4 levels within the Association
- o Legislative i.e. asbestos or gas regulations
- o Corporate i.e. stress management or equalities training
- o Team i.e. arrears management
- o Individual

Identification of Learning and Development Needs

Departmental training meetings will be carried out on an annual basis in order to discuss both individual and team training requirements; the Management Team will discuss legislative and corporate training requirements and the information gathered will be passed to the SCSO and used to create an annual training plan for the Association.

Short and Long-Term Objectives

When carrying out skills mapping and discussing learning and development needs, managers and their teams must keep the short and long-term objectives of the Association in mind at all times. The SCSO and the Management Team will cross check the annual training plan against the objectives.

**Departmental Business Objectives** 

Departmental business objectives are detailed in the Business Plan, managers will refer to the relevant ones for their department when discussing training needs with their team at the annual training meeting and throughout the year in order to make sure that all objectives can be met.

## Learning and Development Evaluation of Effectiveness

It is essential to regularly review and assess the learning and development that has been carried out in order to measure the effectiveness. It is acknowledged that measuring the effectiveness of certain training activities can be difficult, however where possible an effectiveness measurement will be carried out. A range of informal and formal evaluation methods will be employed including:

- Coaching by manager
- Direct observation (by manager and peers)

• Return on investment (the SCSO will carry out an evaluation on an annual basis)

• Post-training questionnaires (the SCSO will evaluate these on an annual basis)

- Return on expected outcomes (for example individuals are able to demonstrate those new or enhanced competencies that the learning intervention was anticipated to deliver)
- The impact on the Association's key performance indicators

## Development of the Necessary Competencies

The Association has developed a competency-based framework, as well as addressing the business objectives, learning will be focused on the development of the necessary competencies in order to enable individuals to perform to the best of their ability.

## Review of the Strategy

The strategy will be reviewed by the SCSO and the Senior Management Team on an annual basis and amended as necessary.

Adequate budgets will be set aside for Training & Development of staff and training and conferences for Committee Members. The training budgets will be agreed with the Committee in February each year.

In addition details of training courses for both staff and Committee Members will be circulated when they are received by the Director.

During 2015-16 we implemented a new IT system, and we continue to focus on ensuring staff are adequately trained on using the system.

The Property Services department will continue to develop skills in using the Asprey system.

## **INVESTORS IN PEOPLE (IIP)**

The Association will continue to embrace the principles of Investors in People (IiP). The Association achieved the Silver award in 2012 following the January 2012 assessment and went on to achieve the Gold award in 2014. The Association has opted to be assessed using the new IiP standard introduced in 2015. The sixth generation of the standard contains nine indicators that put management excellence at the heart of the organisation.

#### AWAY DAYS

Following our ongoing Staff Satisfaction Surveys, there is a commitment to closing for one day every year for a team building session. The next teambuilding day will be in September 2019, we are also going to introduce a half day learning session in August / September 2020.

The senior management team and senior staff will have an away day every second year, and in the alternate years the senior management team and all staff members will have a strategy planning meeting with the Committee.

## **STAFF HANDBOOK**

The Staff Handbook has been designed by staff and contains information, policies and procedures to assist staff in carrying out their day to day duties. Staff can access the handbook via the company's server.

Examples of the Policies in the handbook are as follows:

- Conditions of Service
- Code of Conduct
- Dignity at Work
- Recruitment Policy
- Training & Development Policy
- Communication Policy
- Stress Policy
- Whistleblowing Policy

## IT PLAN 2019-20

## **OBJECTIVES**

The objective of the IT plan is to ensure that Knowes continues to operate adequate systems to support the business both this year and in the future. The systems in place, and to be put in place will be designed to maximise the benefits of technology and increase the efficiency of the Association, provide management information and improve customer service.

## **OVERVIEW**

The Association's Exchange mail server **is** currently Office 365 which is cloud hosted. We have three serves – Server 1, Server 3 (back up only) and Server 4 for remote access. (The old server 2 has now been virtualised to server 1 and is defunct).

The main software management systems are, Aareon QL, Asprey's E-state pro Asset Management and Component Accounting systems, Open Accounts (now held as read only) and Sage Payroll which replaced OpenPeople in July 2017.

The main operational system on the Association's PCs is Windows 10 and Microsoft Office 2013 (updated from 2011 in 2015-16 to accommodate documents produced from QL).

Other systems include Scanfile (upgraded to V8 in December 2007), Kellio (staff clocking system – upgraded in October 2018), Survey Monkey, HR system, Interact (staff handbook) and various Microsoft publishing tools.

## **STAFF**

Knowes' ICT Manager has responsibility for the management of Knowes' ICT systems and liaising with the IT support company – currently Tecnica.

We also have an IT project group which meets on a six weekly basis with staff from each department discussing how to build upon and improve on the use of our IT systems.

#### **Document storage**

As far as possible Knowes aims to store all of its data files electronically.

Currently Knowes uses QL and Scanfile document storage and retrieval system to scan and store all paper files. We have an annual maintenance contract with Concept who supplies Scanfile and the system will continue to be supported. The Aareon QL system has an integrated document management system and as an organisation we are storing most of our customer and property related documents in QL and moving away from storage in Scanfile

In 2016 the Scanner printer has been upgraded as has the scanner PC.

## HARDWARE

Knowes has three operational servers as detailed above.

We are currently backing up our system on a daily basis to Server 3. Daily backups are made via a dedicated fibre optic line to a server within Tecnica's premises.

In 2019, we moved away from individual desk PCs to thin client installations for staff.

## QL AND QLx

On 1 March 2016 Knowes went live with the new Housing Management and Financial Software.

The modules implemented and now live are as follows:-

- Customer relationship module (CRM)
- Rent Accounting
- Repairs and maintenance
- Finance nominal ledger, purchase ledger, cash books
- Task management centre
- Visual studio and Report writing
- Voids (to be implemented April 2020)

#### **TELEPHONY**

The telephone system was upgraded in 2018 and now incorporates call recognition, voice mail, direct dial and auto attendant features; these have increased the efficiency within the office. Arthur McKay is the supporting telecommunications company for Knowes HA. We are looking to move to a Session Initiation Protocol (SIP) system from July 2019.

## **FRANKING MACHINE**

We have extended the contract of Knowes' Franking Machine for a further year. We are also using of 'i-mail' which is the process of sending letters directly to an external company which will envelope and post for us. This is proving to be more cost effective for owner invoices and other large mail drops.

## **PRINTERS/PHOTOCOPIERS**

In February 2019 we purchased our existing printer/photocopiers and we will continue to run these for as long as they are supported and meet the business requirements. The support company is NCS.

## ASSET MANAGEMENT AND COMPONENT ACCOUNTING SOFTWARE

In the year 2011/12, Knowes implemented a new asset management and component accounting system. This was to meet the information requirements of increased housing and financial regulation by the Scottish Housing Regulator and the Accounting Standards Board respectively. The company which was chosen to provide this software was Asprey Management Solutions and their software is E-Statepro. This package was chosen as the most cost effective means of meeting the objectives of the organisation with regards to asset management and component accounting. The implementation of the new system took place from April 2011, the new system is currently live and the Association staff will continue to update the system with the results from the current stock condition survey.

The decision has been made by the Management Team to carry on using E-state pro rather than switching the asset management module in QL as the former better meets Knowes business requirements. The Property Services Team have had recent training on E-state pro and the staff at Asprey will be assisting Knowes in inputting the data from the next stock condition survey which will be completed by the end of this financial year.

We are also investigating an add-on to the current system called Contract Pro which may improve the system.

## **OPENACCOUNTS**

Knowes' accounting software was OpenAccounts. From 1 March 2016 we switched to QLx which is fully integrated with QL Rent accounting and repairs modules.

However as historical transactions could not be uploaded from OpenAccounts to QLx we will require to retain access to OpenAccounts for five years following transfer. We have arranged this with Orchard. There is a cost to this - £972 per annum for five years.

## **INTERNET**

Knowes' website was updated in 2016 following a virus attack on our existing site. We have changed our host to Kiswebs and we are working with Alan Neary to update the site.

We will continue to look for other ways we can use the Internet and e-mail to improve the way we do business with our suppliers. There will be the opportunity with the QL system to create supplier and customer portals.

## MAINTENANCE AND DISASTER RECOVERY

All new equipment will have a 3-year onsite warranty.

Our critical equipment (servers) has a maintenance contract in place through Tecnica which means that the equipment will be repaired or replaced in the event of a breakdown.

In January 2018, Knowes went out to tender on its IT support services. Tecnica Ltd was appointed for a minimum of three years to provide hardware maintenance cover and IT support services.

Disaster recovery assistance is provided by Tecnica and Knowes have a contract with Clydebank Housing Association to use their disaster recovery suite in Clydebank Resource centre in the event of Knowes' office being non-accessible due to a major incident.

A daily back up is made to Server 3 and also an off site server at Tecnica. We will ensure that Tecnica test this back up periodically.

#### KNOWES' FIVE YEAR PLAN IT FOR 2019 - 2024

| Objective                           | Estimated cost                | Timescale                  |
|-------------------------------------|-------------------------------|----------------------------|
| To implement the voids module of QL | 2 days training<br>with staff | 1 <sup>st</sup> April 2020 |

| To further train staff on new system  | On-going  | ongoing           |
|---|---|-------------------|
| To utilise the new system as effectively<br>as possible and review existing work<br>practices.              | n/a   | Ongoing           |
| To increase IT knowledge and skills in all staff and to provide appropriate training for staff as required. | Staff time  | Ongoing           |
| Develop use of intranet   | Set up costs and<br>ongoing costs for<br>intranet | 2019 onwards      |
| Upgrade server cabinet to house all servers   |   | April to May 2019 |
| Upgrade website   | £2500   | September 2019    |
| Cyber security testing  | £5000   | October 2019      |
| Move to SIP telephony   | £2500   | April to May 2019 |
| DWP secure email  | £2500   | 2019              |
| Assessing demand for and Developing customer portal to pay rent, access accounts and report repairs etc.    | £25,000 to £50,000                                | 2024              |

### PROPERTY ASSET MANAGEMENT PLAN

2018-19 to 2022-23

#### INTRODUCTION

The purpose of this plan is to ensure that the Association's property assets are strategically managed in line with our overall business strategy. This plan forms a framework which explains how our property assets support the business by asking the following questions.

- Why are property assets important to Knowes?
- What do we need?
- What have we got?
- What will close the gap?
- How do we know we are getting there?

In answering these questions we will cross reference our business aims and objectives:

The Association's departmental objectives will reflect the Property Asset Management Plans direction. The processes detailed below have been used in producing the current plan, and will also form a template for revising the plan on the 5 year cycle.

## WHY ARE PROPERTY ASSETS IMPORTANT TO KNOWES?

Property assets are important to the sustainability of Knowes as without good quality property assets we would be unable to achieve our mission to "provide good quality affordable housing and services which meets the needs and aspirations of the community we serve...." Property assets generate 95% of our income and are security on our loans.

#### WHAT DO WE NEED?

To consider what we need we will look at the demand for our properties and the views of our tenants regarding the properties they live in.

#### West Dunbartonshire Demographic Context

The information below is taken from the Glasgow and Clyde Valley Housing Needs & Demand Assessment 2010. The Glasgow and the Clyde Valley Strategic Development Planning Authority (GCVSDPA), in exercise of the functions delegated to it by East Dunbartonshire, East Renfrewshire, Glasgow City, Inverclyde, North Lanarkshire, Renfrewshire, South Lanarkshire and West Dunbartonshire Councils, has prepared a **Main Issues Report** (MIR) and related **Environment Report** for consultation. A series of supporting **Background Reports** featuring more detailed technical information has also been prepared.

The following statistics provide the most recent demographic projections for West Dunbartonshire:

- West Dunbartonshire has the highest unemployment level in the GCV area
- It will take up to a decade for employment levels to reach 2008 levels
- Of those in employment WD has the lowest average wage
- Over the last 17 years there have been reductions in the number of children and young adults, and a significant increase of those of middle age and elderly.

- Over the next 17 years there will be an increase in number of pre retirement and elderly people, over 75s will increase by around 35%
- WD has highest proportion of social rented housing at 38%
- WD population has been decreasing year on year, and is projected to continue to do so by up to 200 people per year
- Number of children expected to decrease by up to 100 pa
- Number of working population expected to decrease
- Number of pensionable age expected to increase significantly 2015 to 2020
- Number of over 75s expected to increase significantly
- Number of households expected to increase by up to 200pa, this is a fairly unreliable projection

## Overview of WD over the period to 2020

WD is the most deprived and economically poorest of the GCV authorities with the highest proportion of social rented housing

Demand for home ownership is relatively weak reflecting persistent out migration which is expected to continue.

Private rented housing in WD is relatively affordable with only 30% of new households considered unable to afford market housing. A large increase in private rented housing (141%) is expected raising the sector to 6% of the stock. The social rented sector is predicted to grow very slowly.

WD will be characterized by a weak owner occupier market with pressure on rented housing.

#### Welfare Reform

Over and above the information obtained from the GCVHNDA detailed above, the introduction of the UK government's welfare reforms will see a significant reduction in the income of many of our tenants. Whilst the decrease in the incomes of people will tend to increase demand for social rented property, a number of people will have real problems in affording to pay the rent

Furthermore, as Universal Credit is rolled out we are also seeing an increase in tenants in difficulties with rent payments. From October 2018 UC live service will be rolled out, this is likely to see a reduction in the Association's income, and an increase in the resources required to collect rent and maintain arrears and bad debt at a low level.

#### Provision of financial and welfare advice

The Association has worked for many years with the Clydebank Independent Resource Centre to ensure that a local service is available for our customers that can provide money and debt advice as well as ensure residents are maximising their access to benefits.

With the introduction of welfare reforms, and particularly universal credit, the Association in partnership with the other community based Housing Associations in West Dunbartonshire applied for a grant from the Scottish Government People and Communities Fund. We were fortunate to be offered grant funding in 2015, and as lead organisation for the project Knowes was responsible for the project delivery, the project was extended to March 2018. Reduced funding will see the outreach delivery halved for the first quarter of 2018-19 and hopefully additional funding can be found to continue to deliver the project thereafter.

This project is providing additional financial advice to residents with local surgeries in all of the Association's local areas. This project is also designed to minimise the impact of the introduction of universal credit as it is rolled out across the country.

#### **Demand for Knowes Housing Stock**

Demand for the Associations housing stock is fair with 201 housing applications being received in 2017/18, which is a decrease of 4% from the previous year, which was up on the year prior to that by 2%. Despite this however, there are still concerns for the amount of applicants requesting 4apt tenemental accommodation particularly the higher floor level flats, and the Association is trying to market these types of properties using different, marketing tools e.g. by advertising them in other Association offices, in the press, web site and through information leaflets etc.

In addition to the direct applications we have received 51 nominations and Section 5 Homeless referrals from East and West Dunbartonshire Council. The nominations and homeless referrals are for all types and sizes of properties. In addition we have the agreement of the Committee to accept referrals from Positive Action in Housing but there have been none in the past financial year.

We have 366 applicants on our lists seeking accommodation, which is a small decrease of just over 1% from the previous year, despite re-housing anywhere between 100 and 110 applicants this year, and applications being cancelled following annual reviews. However this last year has shown a further decline in demand for 4apt flats and this is something that we will need to monitor and manage over the next few years. Most of the demand continues to be focussed on cottage types and smaller accommodation. The Association carries out marketing periodically to generate increased demand to ensure that we do not reach a position where there is difficulty in letting our larger sized properties.

In the last financial year, 99 tenancies were ended, thereby requiring a new allocation. This is an increase of 5 on the previous year. Cottages / four-in-block properties are still in very high demand and with only 13% of these becoming available last year, where turnover remains low. While there are streets which are considered less desirable than others the tenement flats are still a popular choice and there are no designated areas of "low demand" or "difficult-to-let". There is no pattern to where tenancies are terminated and no excessive % turnovers in any one street. By 31<sup>st</sup> March 2018, 100% of our void properties were re-let in under 8 weeks, with 82% of our properties being let in under 2 weeks. Our average days taken to let is 7.6 calendar days, which compares well with other Associations within the West

Dunbartonshire area. This is a result of procedural changes which have impacted significantly on days taken to turnover and our void loss which is also is very low at 0.2%.

#### **Fuel Poverty**

Fuel poverty is defined as a household spending 10% or more of its income on fuel bills. Fuel poverty has risen sharply as energy prices have grown well above inflation in the past 10 years. While Housing Associations have the most energy efficient homes in Scotland, many of the families they house often have limited incomes and are in danger of falling into fuel poverty. Fuel poverty can have a negative impact on health and educational attainment. One in three households in Scotland were in fuel poverty in 2012.

Knowes Housing Association is keen to promote energy efficient homes and is working with energy companies to raise funding to carry out external and internal wall insulation, loft insulation, solar PV and improved double glazing.

The cost of upgrading homes often requires substantial investment and the Association is currently working with energy companies to secure funding to insulate all of our properties. We have a programme of window and heating renewal over the next 5 years though our major repairs programme.

#### **Tenant aspirations**

An integral part of our stock condition surveys in 2007, 2012 and 2017 was to seek the views of our tenants as to the condition of their properties and to rank in terms of importance the areas we should be focusing our investment.

The Tenant Survey mirrored the main elements and components examined in the Stock Condition Survey.

The purpose of this survey was to gauge our tenants opinions of the general condition of their homes and to assess the opinions of tenants as to whether they considered components required upgrading or replacement. The Tenant Survey provided a yardstick for comparison with the Stock Condition Survey in assessing proposals for creating a Property Asset Management Plan incorporating Life Cycle Costing.

## WHAT HAVE WE GOT?

#### **Properties**

To identify what we have in terms of the condition of our assets, Knowes Maintenance Policy states that a sample of at least 10% of each property type will be surveyed every 5 years, and that a 30 year life cycle cost projection will be produced based on the survey data. To this end a stock condition survey was procured in August 2002, 2007, 2012 and again in 2017. JMP carried out surveys between November of 2016 and January 2017 with a final report being issued in March.

Within each Element up to 32 different categories were examined in line with the SHQS pass fail criteria.

In the Stock Condition survey it can be seen that there was no work required to achieve the SHQS, and abeyances will be brought up to standard as properties become vacant.

Looking forward, the Scottish Government has introduced a minimum energy standard for social housing, to be achieved by 2020. We have now assessed all of our properties in relation to the standard, and at the time of writing this plan 30 properties fail the EESSH. Assessment against the EESSH will be a continuous process as we carry out energy improvements to our properties. Over the last year we have brought a number of properties up to EESSH standard, and we will be EESSH compliant by 2020.

#### **EstateConcerns & Initiatives**

The Association has 1 Housing Manager and 3 housing officers who deal with incidents of anti-social behaviour, neighbour nuisance and estate management/improvements. This is done in accordance with Association Policies and Procedures, and in partnership with West Dunbartonshire Council's Anti-Social Team, and other agencies.

Faifley does not suffer excessively from anti-social behaviour although there are ongoing cases and incidents, as is the case with most housing schemes. The Association, with partners, takes early action to resolve incidents and to date has been successful in doing this. Over the last financial year there have been no evictions due to ant-social behaviour.

Every common area is inspected as part of an inspection regime to check condition, safety, repair issues etc. and the results of this are acted on. This ensures that our common areas and closes are not spiralling into any sort of decline. A close cleaning contract is operational in approximately 70% of our closes, and this has proven to be a success which is demonstrated in satisfaction surveys. In addition, the contractor takes care of bins to ensure that there is cleanliness and a lack of dumping in these areas.

Knowes HA has 43 lock ups in 3 different locations in Faifley Road and Swallow Road (2 locations in Swallow Road). These lock ups are rented from the Association by local residents and our income is £14,484 per annum (16/17). Five years ago saw the Association demolish 8 of the lock ups and open up a boundary wall on the periphery of the Swallow Road lock up site to increase openness and hopefully reduce crime, dumping etc.

Although there is limited supply and demand for lock ups in Faifley, the Association will continue to monitor both the demand and supply for lock ups in the area, and should any of the lock ups require significant repair or investment, then consideration will be given regarding demolition or retention.

#### WHAT WILL CLOSE THE GAP?

To balance the need for maintenance / component replacement as detailed in the stock condition survey with the aspirations of our tenants, the results of the tenant survey are overlaid on the technically based life cycle replacement schedule. Where possible the life cycle schedule is revised to make the replacement schedule resemble the tenant's aspirations. We also have a dialogue with the Technical inspector to ascertain information on historical defects and opinions on general condition of property types.

In considering proposed future work, an appropriate spread of expenditure is necessary to ensure that there will be no excessive financial peaks and troughs.

The output from the survey indicates that windows in particular have a life expectancy of less than previously predicted. This is due to a number of factors. Many of the windows are in sound condition, however are draughty and attempts to rectify them in many cases have failed. As a result a programme of window replacement is being carried out, and by 2019-20 we should have replaced all of the windows in our stock, the tenant survey also noted that windows were the top concern. Bathroom and kitchen upgrading feature in both the stock survey and tenant survey, and these feature in the 5 year plan along with heating system upgrading and communal close flooring. The stock Survey confirms that the significant expenditure over recent years has kept the Association's stock in a good state of repair. A summary of the projects proposed for the 5 year period 2017-18 to 2022-23 are detailed below.

#### MAINTENANCE PROJECTS 5 YEAR PLAN 2019/20 - 2023/24

The costs detailed below are based on a 2017 cost base.

| 2019/20 (Year 19)   | £                  |
|---|--------------------|
| Description of Work   | Cost -<br>original |
| <b>Dwelling Doors Phase 10, Type 4,6,8 &amp; 9</b> (Langfaulds Cres, Whitehill Cres, Limekilns, Lennox, Abbeylands) | 150,000            |
| Kitchens Type 1,2,6, 14 &15 (Abbeylands Rd, Lennox Dr, Craigpark St)  | 250,000            |
| Bathrooms Phase 13  | 68,000             |

| Paths Type 13 (Veitches Crt)  | 3,282   |
|---|---------|
| Heating Phase 13 (Whitehill Cres)   | 74,203  |

| Contingency  | 75,000  |
| Total Budget Estimate                              | 249,000 |

#### HOW WILL WE DO IT?

The projects detailed above will be procured in accordance with the Association's procurement strategy, using a mix of partnering arrangements and traditional tendering where appropriate.

Prior to the start of each financial year our Property Services Manager will prepare a budget report for approval by committee, detailing the proposed projects for the following year and estimated costs. In preparing the report each of the proposed projects will be reviewed to confirm the accuracy of the requirement to carry out the proposed work and check the owner occupier implications.

The budgets will be set as part of the overall budget and rent setting process and will also depend on funding being available from the Association's cash reserves.

## HOW DO WE KNOW WE ARE GETTING THERE?

Progress will be monitored on a monthly basis throughout each year. The Property Services Manager will report to committee outlining progress in

relation to programme and spend in relation to budget.

Should there be any variance in progress in any of the financial years in relation to programme; this will be rectified in the following financial year.

The Property Asset Management Plan will be updated annually as part of the Business Plan Review.

### WIDER ROLE AND DEVELOPMENT PLAN 2019-20

#### 1. BACKGROUND

Many of the post codes in the Faifley area fall into the lowest 15% of areas of multiple deprivation in West Dunbartonshire and the issues facing this neighbourhood have been well documented. These include:-

- a high level of unemployment
- underachievement amongst school leavers
- higher than average levels of drug and alcohol abuse
- health and well being problems
- fear of crime and anti-social behaviour
- with all these factors leading to family breakdown and social stigmatisation of the area.

The above issues cause a number of problems for Knowes as the principal provider of housing within Faifley:-

- The perceived problems of the area lead to a high turnover of stock due to people moving away as soon as they attain higher levels of income.
- Drug and alcohol abuse lead to higher crime levels and anti-social behaviour issues which Knowes as landlord and disponee is obliged to deal with.
- Health problems and family breakdown lead tenants to ask for certain types of properties which Knowes may not be able to supply
- Crime leads to higher levels of vandalism to houses and the surrounding area which costs Knowes an increasing amount of staff time and money to rectify each year.

## KNOWES' ROLE IN THE COMMUNITY

Knowes Housing Association has considered its role in the community and where appropriate will become involved in wider action projects which help alleviate the social problems which the residents of Failfey and Duntocher face.

Through its wider Action role, Knowes aims to meet its vision of *"playing a lead role in the regeneration of Faifley and Duntocher"* and hence Knowes' wider action objective is to support projects which:-

- Reduce levels of crime and anti-social behaviour
- Increase levels of employment
- Improve resident satisfaction with Faifley
- Widen learning opportunities available for young people
- Strengthen feeling of well-being and security among Faifley's elderly residents
- Increase the number of people wanting to move into Faifley and stay
- Engage with young people

In carrying out its wider role activities, Knowes will aim to serve the social justice strategy of the Scottish Government which sets out the following principal objectives:-

- The elimination of child poverty
- Full employment by providing opportunities for all those who can work
- Securing dignity in old age
- Building strong inclusive communities

In considering its wider role in the community, Knowes will aim to work in partnership with and complement the work of:-

- Community Links Scotland,
- West Dunbartonshire Council,
- Faifley Community Council,
- Faifley Housing Association,
- Community police and other agencies involved in Faifley

Knowes will also work in partnership with its main contractors in order to secure local employment, corporate sponsorship for community regeneration and design new build projects which meet the aspirations and needs of the community, alleviate health problems and reduce crime.

Knowes will continue to analyse and assess wider community needs through:-

- Resident focus groups (where appropriate)
- Surveys and questionnaires
- Community consultation exercises
- Meetings and consultation with partner agencies
- Monitoring

#### LEGAL ISSUES/FUNDING

Knowes is legally and constitutionally permitted to carry out wider role activities which fall into the following categories:-

Object 2 (a) (iv) of Knowes' rules permits *"the carrying out of any activity permitted under Section 4 if the 1985 Act provided always that any such activity is charitable in law".* 

Object 2 (b) (ii) allows Knowes to "provide amenities or services for the benefits of those persons (occupying the houses) either exclusively or together with other persons."

Knowes does not aim to make a profit from its wider role activities but aims to meet its own regeneration objectives and the objectives of the social justice strategy.

Knowes will fund these activities by raising grants from appropriate bodies and corporate sponsorship from its contractors. Knowes will be assisted and advised in this area by Community Links Scotland. Community Links Scotland (CLS) is an independent company which has been set up with funding from the Scottish Government and subscriptions from West Dunbartonshire Housing Associations for this purpose.

Knowes' contribution will include in-kind support from its staff and use of its premises where appropriate. An annual budget will be set for wider action projects which will be approved by the committee. The committee have also approved the utilisation of the feed in tariff fee obtained from the solar panel project for wider role projects in the community. This will be kept in separate fund for present and future projects.

Knowes will separately record the funding and spend of each wider role activity and measure the time of staff spent on planning and sustaining projects and meeting with partner agencies. Knowes will monitor the success of each project through recording results, interviews with participants and measuring levels of participation. Key crime indicators obtained from community police and measure of anti-social behaviour and vandalism may also be appropriate to as effective performance indicators.

#### DEVELOPMENT

One of Knowes' objectives is to identify and pursue development opportunities, and to this end Knowes is in discussion with WDC with a view to develop the Bowling Green site at Abbeylands Road for approximately 25 properties.

## CURRENT PROJECTS

A list of current projects is given in Appendix 1
